

How to set up De:comments

1. After the purchase download the plugin to your admin console with following link
<http://www.yoursite.com/wp-admin/plugin-install.php?tab=upload>
2. Then goes to the de:comments link in the left side, in Comments section and enter e-mail and license key from the letter that we send to you.
<http://www.yoursite.com/wp-admin/edit-comments.php?page=decomments-index>
3. After all this actions, you will be proceed to the plugin setting page.

The screenshot shows the 'de:comments settings' page. On the left is a dark sidebar with a menu including Dashboard, Posts, Media, Pages, Comments (highlighted), All Comments, de:comments, Discussion settings, Опросы, Appearance, Plugins, Users, Tools, Settings, Custom Fields, and Collapse menu. The main content area is titled 'de:comments settings' and has a 'Save' button in the top right. It features a sub-menu on the left with options: Comments, Social, Voting, Avatar, Subscription, Badges, and Notifications. The 'Comments' section is active, displaying various settings: 'Don't display de:comments logo' (checked), 'Allow to quote comments' (checked), 'Disable replies' (unchecked), 'Time to edit / delete comments (minutes)' (30), 'Display comment box on top of list' (unchecked), 'Add dofollow or nofollow to commentators links?' (dofollow selected), 'Allocate comments of post author' (checked), 'Main color' (Select Color), 'Allow HTML in comments' (unchecked), 'Display numbers of comments' (checked), 'Display the total number of comments at the top' (checked), 'Enable embedding external media URLs' (checked, with a limit of 3), 'Enable field "Website" in the form of comments?' (checked), and 'Maximum size of uploaded images' (5 MB).

4. If you have any kind of problems in this you can write about it in support section on
<https://decomments.com/support/>

Details about setting

1. The first option can disable de:comments logo in the bottom of the comment form on your web-site. It will be good for your SEO, but remember that you can not be a part of our affiliate program without this.

☒ Don't display de:comments logo

<https://decomments.com?ref=>

2. The second option allows user to insert quotes into comments
3. By clicking next one, you can disable replies for users. It is a good option for someone who will use comments for voting, for example.
4. Also, you can customize time for edit and delete a comment. You can set in this field 0 if you do not want to give this option to users.
5. "Display comment box on the top" will bring it to the top of the tread if it is not turned on comment box will be in the bottom
6. Next option also will be great for SEO. You can add dofollow or nofollow to all commentator's links

Add dofollow or nofollow to commentators links?

☒ dofollow

☐ nofollow

7. In the color field, you can set the main color of all action elements and hovers in comments.
8. By clicking "Allow HTML in comments" you will allow users to insert and kind of code in the comment box.
9. Next two options will turn on comments counter in the top of comment box
10. As you know, de:comments works good with all links from social networks and show it in the best way. However, you can set up the limit of links from social networks in one thread
11. You can enable or disable native WordPress field "Website"
12. And the final main option about pagination, show more or [lazy-load](#) in comments. This option depends on the number of comments on your web-site and speed of your server. So just try all of them and choose the best for you.

More settings

- Social options - you can choose social networks for logging in on the site and commenting, but you have to instal and configure properly [WordPress Social Login](#) plugin.
- In Voting block, you can allow or disallow likes and dislikes for comment, and bring the top comment with the custom number of likes.
- Also, you can set your own avatar for users without it, set avatar's size and form.
- In subscription block, you can set up options for sending e-mails about comments and replies, but remember that your mail-server should be ready for this amount of letters.
- For the most active users, you can add badges. We give some amount of options, you have to add badge picture 20x20 px and fill numbers in conditions fields. Badges will appear near to the user's name in all his/her comments.
- In final block, you can customize letters texts. It is letters that subscribed users will receive.
